Customer comments on GEKKOU DRILLS

Sharpness

- Best bite for the stock
- Easy penetrating
- No vibration at starting
- No vibration during the drilling
- Unnecessary pilot hole even big size dia.
- Rapid processing because unnecessary pilot hole
- Cutting chips have no heating
- Small anxiety of mixing as continuous chips (Food, Medicine industry)
- Continuous chips make us easy cleaning up (Food, Medicine industry)
- Less burrs at exit hole
- No expansion at inlet hole
- Good surface finish inside of hole
- No burn for chips even facing up
- Tool durability can be improved in next process as low work hardening

Durability

- No high temperature at cutting
- 4 pcs of GEKKOU DRILL is enough instead of 20 to 30 pcs of conventional drill(AISI 304 8mm, 8mm dia.)
- Low breakage even small dia. drill
- Number of cutting hole increased very much when using cutting oil

Price

- Customers in Trade Show assume 3 to 4 times in price compared with conventional drills
- But GEKKOU DRILL actual price is 30 to 50 % higher in price, which is much reasonable
